

Temiskaming Hospital No Smoking Policy

We'd like to advise all of our patients and visitors that the Board of Directors as of September 2006 agreed to the following as policy for Temiskaming Hospital:

- The only persons that are allowed to smoke on hospital property are in-patients and staff of the hospital and then only in a designated area, i.e
- All others, please be advised that when entering the property, including the parking lot, smoking is not permitted.
- This decision was made as leaders in health care to discourage the use of tobacco products in our particular health care setting.
